

STEEL AND MOLTEN METAL

A Tough Job Takes Tough Equipment and Talented Teammates

Steel Mill operations are demanding. In the steel production process a multitude of equipment is used to handle the raw materials to the finished product.

Working with our steel industry clients across the country, we focus our attention and priority on real world training programs: Scrap Handlers, Overhead and Mobile Cranes, Kress Carriers, Hot Pit Loaders, Skid Steer Loaders, Slab and Coil Haulers, etc.

Our expertise and assistance in the scrap and molten metal industry has rewarded our clients with improvements in safety, care of equipment, compliance to safe job procedures, equipment inspections, proper operating techniques, improved operational efficiency, etc.
