

RAIL SWITCHING OPERATIONS

Have you elected to implement your own Rail Switching Operation?

- Control your own rail service and fees
- Eliminate dependence on common rail carriers service restrictions
- Spot your railcars for loading and unloading in a timely manner

Railroad operations are not unsafe, but they are unforgiving. Using unsafe procedures can lead to catastrophic accidents and life-changing event.

Shephard's has developed comprehensive training materials for all types of Railcar Switching operations: Switch Engines, Rail King, Trackmobiles, and Shuttle Wagons, in addition to Switchman's responsibilities.

We provide detailed structured and consistent training to all of your designated teammates which includes rail industry best practice procedures.
